

Writing Workshops for Kids

Our mini workshops are designed for children from years 3-6 and run from 50-90 minutes. They are tailored to suit your needs and incorporate a variety of writing tools including:

- Storytelling
- Character and story building
- Structure
- Interactive activities to encourage creative flow.

Kids are encouraged to build on their own talents and explore the many adventures of story, through creative writing.

Full day workshops offer a more detailed program including:

- Storytelling
- How picture books come together
- The story arc
- Character and story building
- Map making and writing exercises to stimulate discussion and help kids fully explore their writing aspirations.

Kids will learn techniques to help generate new ideas, new skills they will be able to take forward, not only in their recreational time, but also apply to school work.

Let Creative Kids Tales Speakers Agency add that sparkle to your next event.
